Aerospace Enterprise—satellite and other aero-based projects

Consumer Products Manufacturing—disposable consumer products

Alternative Fuels Group—alternative fuels for industrial and commercial applications

Entrepreneurial Enterprise—identification, assessment, and marketing of new technologies

AquaTerraTech—ground water evaluation and planning

Formula SAE Car—Indy-style race car design and competition

Automotive Systems Engineering—engineering consulting services

Husky Construction Enterprise—low-cost, energy efficient construction solutions

Blue Marble Security Enterprise—homeland security technologies

Husky Game Development—gaming products and technologies

Board Sport Technologies—innovative boarding products, materials, and processes

IT Oxygen—internet-based solutions for technical education

Challenge X—hybrid electric SUV design and competition

Innovative Castings Enterprise—casting methods and materials

Clean Snowmobile Challenge—noise/emissions reduction

Integrated Microsystems—wireless integrated microsystem technologies

International Business Ventures—business development services with international collaboration

Mini-Baja SAE—mini-baja vehicle design and competition

NVH Enterprise—noise and vibration reduction for industry

Pavement Design—design, materials development, and construction

PrISM—integrated sustainable manufacturing

Robotic Systems Engineering—robotic manufacturing technology

STC/Arts Enterprise—documentation, media development, and communication solutions

Wireless Communication—wireless communications, hardware, and software development
