Objectives for 2011-12

1. Design a prototype solar vehicle that will:
   • Be 100% renewable energy efficient
   • Have an Aerodynamic form
   • Be made of alloy metals
   • Maintain a faster speed and greater driving distance.
Program Stats

- The program currently has 92 members.
- The program is both a class and an after school club.
- The program is in its third year of HSE.
